Dear Valued Customer,

As you are aware, Hospira is in the process of upgrading our product portfolio to eliminate redundant list numbers in an effort to supply you with the relevant products you need. This will enhance our ability to dedicate the necessary resources towards additional innovations and introductions of new products to meet your clinical needs.

During this process, it is our goal is to work closely with you to provide as much advance notice as possible in an effort to avoid unnecessary interruption in your patient care. Due to the lead time within the supply chain it is often challenging to orchestrate this process with the precision for which we strive.

Hospira has created a customer focused web site to assist with the communication process. If you log on to the [HospiraAdvanceWithUs.com](http://HospiraAdvanceWithUs.com) web site, you will be able to search for specific list numbers to get a status update. We provide monthly updates and downloadable Excel files for your convenience and there is also a web portal for you to ask specific questions.

We are pleased to let you know that Hospira has reversed our deletion decision on several IV and irrigation products based on market conditions. The following products will be retained as part of the Hospira product portfolio. Supply levels may be tight for the next several weeks as we ramp up production. Please work with your Hospira account manager regarding product availability.
